

RAILWAY PROMOTIONS

J. P. BURNS.

A. H. CADIEUX.

Mr. J. P. Burns is appointed Assistant Chief of the Dept. of Investigation of the Canadian Pacific Railway, with headquarters at Winnipeg, succeeding Lieut.-Colonel William McLeod, deceased. Mr. Burns entered the service of the Canadian Pacific as chief clerk in the Investigation Department, Montreal, having been connected with it since its inception in January, 1913. He was attached to the Montreal office as assistant to Mr. R. G. Chamberlin, chief of the Investigation Dept., prior to which he was for many years private secretary to the late Silas H. Carpenter, who was then Chief of Detectives of the City of Montreal. Previous to entering police work he was employed in various capacities with the Grand Trunk Railway System, the Boston & Maine

Railroad and the Intercolonial Railway. Mr. A. H. Cadieux is appointed Assistant to Mr. R. G. Chamberlin, chief of the Canadian Pacific Investigation Dept., with office at Windsor St. Station, Montreal. Mr. Cadieux joined the service in July, 1913, as investigator in the Investigation Dept. In May, 1915, he became inspector, and from this position he goes to fill the vacancy created by the promotion of Mr. J. P. Burns. Previous to entering the service of the Canadian Pacific Railway he was connected with the Grand Trunk Railway for a number of years; he was special agent from 1907 to June, 1913, when he severed his connection with that railway to accept a position under Mr. Chamberlin, Chief of the Dept. of Investigation.

STEELHEAD SALMON IN GREAT LAKES

Does it go to prove contention of one school of scientists that steelhead salmon and rainbow trout are identical? An exceedingly interesting story surrounds the discovery of steelhead salmon in the Great Lakes. This species is indigenous to the Pacific and the manner of its arrival in interior waters contributes an interesting point to the long-standing dispute as to the relationship between rainbow trout and steelhead salmon. For some years the authorities of the State of Michigan have been releasing rainbow trout fry in rivers and streams entering Lake Superior. Only a few months ago a species of salmon was caught in the neighborhood of Whitecloud Island, Georgian Bay, which upon examination proved to be the true steelhead of the Pacific. The flesh of the species in its native waters is pink, while in this case it was nearly pure white, due, no doubt, to the fact that it had never left fresh water.

For a long time scientists were in controversy as to whether the rainbow trout and steelhead salmon were one and the same or merely closely related species. There appears no other way of accounting for the presence of the steelhead in the lakes except that they developed from the rainbow trout eggs artificially introduced and released in Michigan.

STEWART MAY BE GIVEN SEAT IN WEST KOOTENAY

Vancouver, B.C., January 28.—There is a possibility that W. J. Humphreys, Liberal member-elect of parliament for East Kootenay will return to permit Hon. Charles Stewart, minister of the interior, to contest the seat in the Liberal interests, according to a special dispatch from Victoria to the Vancouver world. This dispatch says that gossip in this capital, where a Liberal caucus of provincial members is being held, has it that Mr. Humphreys will be not unwilling to concede the seat to Mr. Stewart.

WEEKLY NEWS

BULLETIN

Issued by Publicity Commissioner, Government Buildings, Edmonton.

January 28, 1922. Hon. George Hoadley, minister of Agriculture, has made application to the Canadian National Railways for the operation of a mixed farming special train to be operated on the C.N.R. and G.T.P. lines east of Edmonton to the provincial boundary, similar to that train which has been operated by the C.P.R. and is now operated in the southern part of the province. If the National Railways agree to operate this train, it is the intention of Mr. Hoadley to have it operate one week on each line, touching at specified points, where accurate time given morning, afternoon and evening, on agricultural matters.

Special meetings for farmers at various points on the railway lines of Southern Alberta commenced last week at Foremost, south-east of Lethbridge. This week meetings will be held at points on the Coots and Cardston lines, commencing at Milk River next Monday and touching Warner, Stirling, Raymond, Magrath, and Cardston. The week following, the meetings will commence at Pincher Creek and will touch Madoc, Grassy Lake, Bow Island, Windfall, Seven Persons. The week of February 13 will be spent on the Suffield-Lomond line. The speakers to be in meetings are M. L. Freng and James Murray of the Department of Agriculture.

A series of poultry meetings started last week under the Department of Agriculture, the first being held in Blackfoot on Monday. Vulcan, Champion, Carmanagay and Barons are being touched. The meetings will start at Rockyford on February 6th, and will touch Munson, Craigmyle, Hinton and J. H. Hare are the speakers.

The special mixed farming train started at Acmec last week and visited Irricana, Okotoks, High River and Wrentham. This week it will touch Vulcan, Blackfoot, Stettler, Cardston and Coronation, and the week following, Camrose, Strath, Sedgewick, Hare, and J. H. Hare are the speakers.

Hon. Vernon W. Smith, minister of Railways and Telephones, made it plain at the U.F.A. convention, last week that there was to be no increase of rural telephone rates under present conditions.

Over \$100,000 has already been spent, or will be spent, by the Provincial Government in relief work in the Province, according to statements by Hon. Alex. Ross, Minister of Public Works, of this fact. Much of the construction work of various kinds being done by the government, aside from relief work, may be done by the cost of relief work done by municipalities. The government is opening up a great deal of work over its own account for purposes of relief. It also finds itself under the obligation of providing relief in unorganized territories, which include several large coal camps. The Dominion government is being asked to bear a large part of this. Work being carried by the government includes two large bridges over the Red Deer River, nearly \$200,000 for road work, jail buildings at Drumheller and Edson, and other public buildings.

Over \$100,000 has already been spent in keeping open schools in certain districts of the south. The Department of Agriculture already has given relief to 563 families, cost of building for these families having totalled \$16,500.

The Provincial Government has announced the appointment, temporarily, of Mr. A. F. Jamison as assistant librarian for the provincial library, filling the vacancy caused by the promotion of J. A. Jaffary to the position of librarian to succeed John Blue. Mr. Jamison has had special training in library work, and is a graduate of Toronto University.

Premier Greenfield this week told a delegation from the Alberta Federation of Labor that no legislation will be put upon the statute books without full study and consideration. The Premier stated the delegation that too much legislation had already been put through in past years with undue haste. The delegation presented resolutions passed at the recent convention in Lethbridge which called for a great deal of legislation of a very advanced nature. One resolution called for the sale of real beer, claiming that the prohibition would be eliminated if this were done. Mr. Brownlee told the delegation that he did not agree with them, that Quebec, where there was government control and liquor could be had easily under the law, bootlegging was just as active as in Alberta. Other demands made by the delegation were for legislation to regulate rents; amendments to the Workmen's Compensation Act for extension of medical service to include sickness; for the enactment of legislation for a greater protection of wages of working men; for the establishment of boards to fix a standard of living; for the establishment of a 44-hour week for all workers; for the extension of the school age from fifteen to sixteen years; for the establishment of \$1200 as the minimum salary for teachers; for greater representation, and many other things.

In connection with the \$1200 minimum for teachers, Premier Greenfield said that he did not agree altogether with the demand for a 44-hour week for teachers' salaries should be increased in later years of experience, rather than in the beginning.

A request was also made by the delegation for a better standard of milk in the province. Mr. Hoadley stated that while this was desirable, it opened up a very big question in which there were many questions to be considered.

The report of the Farm Survey Board of Alberta has been presented to Premier Greenfield. It makes some important recommendations with respect to conditions in the south, and a synopsis will be given out for publication shortly.

A bulletin issued by the Alberta Dairywomen's Association calls attention to the fact that large shipments of New Zealand and Australian butter are now arriving on the Vancouver market, a market which rightly belongs to Alberta. This is due to two reasons. One is that Alberta farmers are not producing enough

butter of the proper grade, and the other is that duty on this butter coming in is low, making it advisable for Alberta farmers not only to study quality but also economy in manufacture.

The Alberta Department of Agriculture is engaged in a campaign now to encourage the development of the dairy industry on the farms of the province and will shortly issue new forms for instruction to be filled out by farmers in this branch of farming.

The Red Cross of the province is now proceeding with its appeal for funds with which to supply clothing to the residents in the drought-stricken areas of the province. This appeal has been endorsed by Premier Greenfield, since it is in arrangement with the government that the Red Cross Society has charge of the distribution of the clothing. Contributions to this fund should be handed to the editor of the local paper, who will forward same to the Red Cross.

LARGE NUMBER OF RETURNED MEN SETTLE ON LAND

Complete Figures to End of 1921 Show 27,371 Have Started Farming.

Ottawa, January 27.—Figures complete to the end of 1921 show that 27,371 returned men have been settled on the land under the provisions of the soldiers' settlement act. The applications for the privilege of the act number 62,486, and 44,722 have been qualified. There are fifty-two men in training and 3,118 completed training. The number settled on the land included 21,246 who have been granted loans and 6,126 others who have been settled on soldier grants without loans.

The board states that the amount of money saved to soldier settlers through special purchasing arrangements with manufacturers of implements, harness, etc., is \$981,193, while a saving of \$3,849,009 has been effected by reductions from the vendor's option in the case of land purchased.

Four hundred and sixty-seven soldiers have repaid their loans in full.

FRANCE HAS SIX LIVING UNKNOWN VETERANS OF WAR

Paris, January 27.—France has six living "unknown poilus." The French medical authorities, a complete blank, as the result of horrors undergone during the war, are being cared for by the government, which is seeking to establish their identities.

They have been visited by thousands of persons, but none recognized them, and the minister of pensions has decided to send the unknown soldiers to a market which rightly belongs to Alberta. This is due to two reasons. One is that Alberta farmers are not producing enough

With Winter in the Air

CRÉPE, velours, faille and duvetyn are new weaves among the fabrics Paris dictates for Winter! And colors! Brick red, leaf green and brown—it is as if fashion has brought back, in fabrics, the colors Winter banished from the landscape.

These lovely colors, these exquisite fabrics, you yourself can make into the delightful clothes shown on this page, or any number of others just as smart.

Our prices on fabrics are exceedingly moderate. And there is another saving brought to you by the Deltor—a wonderful new invention—that is enclosed with Butterick Patterns, and with Butterick Patterns only.

The DELTOR Saves You 50c to \$10

1. The Deltor gives you an individual layout chart (yes, an individual chart—not just a general chart but one for your exact measurements and for each suitable width of material). With it, you lay out your pattern—the expert's way. Because if it is you buy 1/4 to 1/2 yard less, a saving of 50c to \$10 on material for every flock!
2. It guides you in putting your garment together so that you attain the elusive fit, drapes and finish of an expert.
3. It gives you Paris' own touch in finish—the all-important things upon which the success of your gown depends.

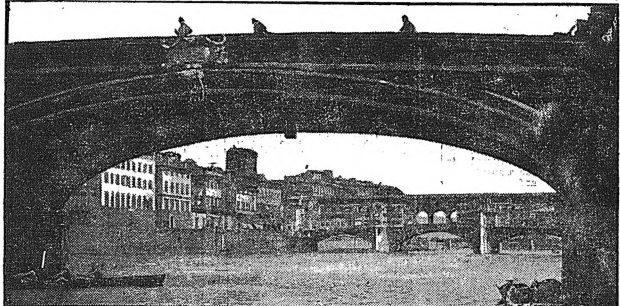

BEFORE you make a single Winter garment, come in and select from the newest Parisian fashions. The Deltor suggests the correct materials and simplifies the making of the most intricate gown.

Florence---Birthplace of Artists

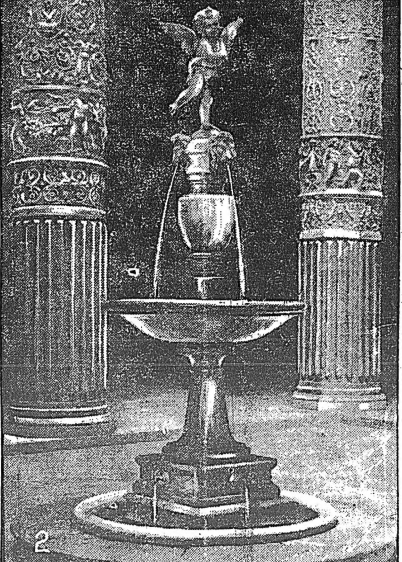

Seen from the top of the Viale dei Colli that curves gently yet with a magnificent sweep up to the Piazzale Michelangelo, among flowering bushes and pleasant fountains from the various hills of Florence, stretches out like a woman in her beauty, between the two banks of the Arno.

It is not astonishing that this fair land should have been the mother of genius, grace and power. As we breathe the air of Florence and inhale the joyousness of its landscape and listen to the vivacious, picturesque speech of the inhabitants, we feel that Florence and the whole of Tuscany is indeed the birthplace of poets and artists; that here art and poetry are spontaneous things, of the same nature as the water that springs from a source or the flowers that grow on the banks of a river.

How could the Florence of to-day banish the memory of Dante? The greatest of all Italian poets, the wickedness of his contemporaries. And their descendants, as if to make amends for the traitors, have gathered out to him, have carved his verse in marble on their street corners.

The house where the Gallies lived and thought cannot be visited without emotion, especially the Villa at Arcetri, where the great scientist spent his last days in blindness and ill health, whence we can also enjoy a panorama of exquisite beauty and peacefulness; and the house of Buonarroti where a nephew of the divine Michelangelo has gathered to create a precious collection of his great ancestor's works.

Florence has not yet reached the status of a great city; on the contrary it has remained a somewhat provincial town, but it remains a town from all through its streets and gives animation without spoiling in the least the charm of the ancient buildings, of the marvelous loggias, of the churches and palaces built by the generosity of the Medici to the great glory of the "city of the lily." Industry has not yet invaded Florence as in the case in the northern towns of Italy, although the production of art works is still an important factor, while the art of manufacturing silk and wool was a source of great prosperity in the time of the Medici.

(1) Florence, Italy, showing the Bridges over the River Arno.

(2) A water fountain in front of the opera house.

collections, our minds are literally saturated with beauty. But no one can have a complete idea of Florence without making an excursion beyond the outskirts of the town, where the surroundings possess great beauty of landscape and a charm which is not easily found elsewhere. A day at Fiesole, where the ruins of the Roman theatre are still in existence, is a joy not soon forgotten. Then, climbing up to Belvedere, we can enjoy a perfect panorama. Further on we find Signa with its terra cotta factory and Oecia where the well-known Giotto china is made. Nor should Settignano, cradle of the sculptor's art of the great Mino, be forgotten. The art of the great Mino, be forgotten nor Vinciguerra, or Valombrosa, majestic buildings of the thirteenth and fourteenth centuries, and those of the Renaissance and "baroque" period, with their fantastically decorated facades and gables in perpetual bloom at their windows, constitutes the most fascinating feature of Florence. Everything has been rebuilt on antique lines; the foundations have been searched of buildings that were no more, so that they might be accurately restored. Facing the Pretorian Palace, situated in the Frigilione Tower, are the

RECIPROCAL ARRANGEMENT IS SOUGHT BY 'CATTLE MEN'

Free Entry for Canadian and American Livestock Asked by Board.

Regina, January 27.—Urging the reciprocal establishment of free entry for Canadian and American cattle into the respective countries, the Saskatchewan live stock board last night passed a resolution urging the Dominion government to take such action as may be warranted to obtain free entry for Canadian livestock into the United States market. The resolution also requests the Dominion government to make arrangements to have Canadian interests adequately represented at Washington.

OUTLETS INADEQUATE

The preamble of the resolution sets out that outlets for Canadian livestock are inadequate to meet existing conditions, and that experience has shown the great value of the United States market to western Canada for live stock, and particularly cattle; and calls attention to proposals of a tariff bill now before the congress of the United States which may give the president discretionary powers in granting reciprocal concessions to countries willing to trade on equal terms.

F. H. AULD, deputy minister of agriculture, was re-elected president of the board, which office carries with it the vice-presidency of the Saskatchewan Live Stock Union. His election was effected in the face of his own objections that the office should be held by an active live stock man and his own nomination of R. A. Wright, Drinkwater, who was later elected vice-president of the board.

OZONE IN SEA AIR

"Concentrated Oxygen" Is Too Strong For Some People.

The seaside air does us good because of the ozone in it. Ozone purifies our lungs. We need it to put us back into "working order."

In other words, we require an attack of poison gas to make us fit for pure ozone is a gas of deadly poison. But it doesn't injure us because of the fact that there is never very much of it in the air.

Some persons cannot stand the sea air at all. It is too "strong" for them, and they are on the sick list during their stay at the seaside. This is because they cannot stand the ozone, says Pearson's Weekly (London).

Ozone is concentrated oxygen. You get a whiff of ozone after a thunderstorm owing to the electric discharges through the oxygen of the air. Sea air is richer in ozone than country air, for ozone is generated largely by the vibration of the waves. Seaside air has just sufficient ozone gently to irritate the lungs. This quickens the flow of the blood. Thus the poisons in the ozone are really tonic.

PUBLIC SERVICE

Like fevers, social movements have their crises, which determine the future of the nation. Most of the so-called present day movements for reform of social and industrial conditions are somewhere near the crisis now. Some of them have already passed the crisis, leaving the patient lifeless and inert.

No movement is in greater need of intelligent direction than the public for economy of administration in civic and other governments. No demand seems to be quite as spontaneous as the idea of reducing the salary of public servants.

Heads are falling and salaries are diminishing in all directions. Some of them have a right to, others seem to work an injustice. The great need of the time is efficiency in public service and organized society should never sacrifice efficiency without due regard for treatment in the matter of remuneration.

Private corporations have often been regarded as superior to public institutions. Why? Largely because efficient men have been secured at salaries that the public would not tolerate in public positions.

Nothing in the operation of labor organizations has done so much to bring about present industrial conditions as the standardization of wages has done. The policy has paid a premium on laziness and inefficiency that are curing the nation today.

When a man sinks to the point where his whole attitude may be summed up in the words "a maximum of wages for the shortest number of hours of minimum production," his value to the community and to the nation has sunk as near as possible to the vanishing point.

If public bodies place a premium on efficiency, the time is ripe for the establishment of salaries, the demands of economy will be served most intelligently by a good man not do his best on an insufficient salary. Sometimes a lazy man will not do his best till starvation stares him in the face.

OPENING OF LEGISLATURE

The First Session of the Fifth Legislature of Alberta will be formally opened on Thursday afternoon, February 2nd. No special invitations have been issued, but a general invitation through the press has been issued to the public to attend, with special seats reserved for Judges, members of the Senate and House of Commons and their wives, and the wives of the Alberta members.

A considerable amount of legislation is already prepared by the Cabinet for the session, and will be presented within a few days of the opening, so that there will be no delay in getting down to business. Only such legislation as is absolutely necessary will be presented at this session. Other equally desirable legislation will be left for the next session, when the Cabinet will have a greater opportunity of investigating desirable features of such legislation.

As has been announced, O. L. McPherson, member for Little Bow, will be the Speaker of the new House. He is now at the Capital, being coached in his new duties. It is expected that the opening of the Session from the Throne will be preceded with on Friday, the day of the opening, after which adjournment will be taken until the following Monday, when the debate on the speech will be resumed. If there are any intending speakers, and, if not, the business of the House will be

time like this, has every other foolish idea backed up by the map.

Surely Brother McInnes will put in a good word for some of his bosom friends from Red Deer while he is in Ottawa.

The "Judges" do not appear among the "twelve apostles" of H. W. Wood yet. Guess there is more money in being a Canadian member of parliament than there was in being one of the original twelve apostles.

MUSICAL CLUB CONCERT

The concert on Friday evening last presented by the Musical Club, judging from the splendid applause and keen attention, suited the audience down to the ground. Indeed, it was, in fact, the best programme yet given by this organization, and featuring, as it did, dances of different nationalities, proved a most enjoyable. The various artists all played so excellently that it would be difficult to pick any one out as the star of the evening. The orchestra, and say this artist's playing was the best. However, the String Orchestra, as usual, proved to be the best, although Mrs. Sanders was undoubtedly absent. Their selections, "Menuet," "Bocheterie," "Gavotte," "Menuet," "Albeniz," were beautifully rendered. Rev. Father's "Gavotte" was a real treat to hear. The orchestra, and I am sure, Madame Lescaulier's efforts in striving to present to the public music of the finest nature is much appreciated.

The violinist of the evening, Mrs. McDowell, played with fine spirit, not only in all the orchestral numbers, but particularly in her solo, "Shepherd's Dance," a German. She brought out from her instrument an abundance of melody of tone coupled with graceful rhythm, which was well received. Madam Quig delighted the audience with "The Kerry Dance," and responded to the encore, "Gavotte," "Song," "Old and New." Miss Nona Quig accompanied very sympathetically.

Performance of exceeding grandeur was displayed by Master Eugene Murphy in the "Deutsche Tanz," a German. Selmon such abandon and breadth of style has been heard by an artist even of more mature years than Master Eugene. The audience were aroused to high admiration and insisted on an encore, which he gave.

Benbow's "The Rain Dance," which Mabel Selmon played Heller's well known "Tarantelle" as an illustration of the Italian dance and her sister, Miss Dora, interpreted the pretentious and grand "Mazurka" of Godard's. Miss Selmon's playing was wonderful, her touch revealing such beauty of perspective—indeed, it is doubtful if it could be interpreted better.

The "Rain Dance," Grunin, a characteristic dance of the Indians, is a thing to watch and hear in a realistic fashion, but in the capable hands of Miss Nona Quig, it was a real treat to see and hear. The audience were aroused to high admiration and insisted on an encore, which he gave.

Throughout the concert, Mrs. R. G. McInnes, the Italian dance and her sister, Miss Dora, interpreted the pretentious and grand "Mazurka" of Godard's. Miss Selmon's playing was wonderful, her touch revealing such beauty of perspective—indeed, it is doubtful if it could be interpreted better.

GOVERNMENT NOW WILL GET DOWN TO REAL BUSINESS

Ottawa, January 30.—With practically all the members of the cabinet in the city or expected to be here today, a busy week is anticipated on Parliament Hill with decisions on several matters which have been under consideration recently.

Hon. J. King, who is in the position of minister of public works, is expected to arrive in Ottawa during the week and will, it is expected, be in a position to advise the government with respect to conditions on the Pacific coast where work on roads and other contracts, awarded just previous to the general election, were ordered suspended pending investigation.

Following a conference between Premier King and the members of the government who are in the city here, it is expected that there will be some announcement as to whether or not the government will accept these works to be proceeded with.

Hon. Charles Stewart, minister of the interior, is expected to make an announcement toward the end of the week as to his plans for finding a seat in the House of Commons.

Considerable interest attaches to the probable date of opening the session, which the cabinet has not yet come up for decision, it is still thought that legislative plans will be sufficient to bring the session forward about the first week in March.

Department heads have been asked to rush along the work of the various departments, so that the cabinet can give them a thorough inspection before they go into the Commons, and apply the same standard to any such action is found advisable.

"D" COMPANY, 1ST BN. A. R. (31st BN. C.E.F.) CARRYING OUT INTENSIVE TRAINING AT RED DEER ARMOURIES

Red Deer can boast, as no other city in Canada, as having one of the finest, strongest and smartest units in the Canadian Non-permanent Force.

It was only this time last year that tentative plans were being launched by the authorities as to the formation of a unit at Red Deer. After a considerable amount of correspondence and forethought, the decision was made to place a command of this unit to the best of his ability, and after ten days of the most exclusive, drawing the

The man who saw the first parade of the Company, passed remarks to the effect that nothing had been made out of the fellows during peace-time, is now gasping for breath with surprise, and if one would only take a trip to Red Deer on Tuesday or Thursday evening to the Armouries, he would spend an hour in the training and admiration of the city's unit.

Every Officer, N. C. O. and man is now putting forth his utmost efforts to reach an exit. A number of others worked their way to safety through scant openings in the building.

The disaster which brought so heavy toll of human life and limb occurred in the early morning, the roof buckling in the middle and falling practically intact to the ground. Under the pressure of several hundred were watching a "Red Deer Quick Wallingford." The roof was under the pressure of several hundred were watching a "Red Deer Quick Wallingford."

The roof crashed, as one woman described it, "like a falling bomb." The roof was under the pressure of several hundred were watching a "Red Deer Quick Wallingford."

training.

The Bandmen are reminded to turn out also at these parades. Provisional arrangements have been made for Sergeant Instructor McDonald, P.P. C.E.F., to give a lecture on instruction on February 13th for all officers, W. O. and N.C.O.s, to qualify for their respective ranks. This class is restricted to 20, and is for six weeks' duration, for three nights a week.

General Inspection.—The Commanding Officer is very pleased with the turn out for the past three weeks, but is still hoping for a better showing in the future. Particular attention is requested to the platoon officers and N.C.O.s, to see that all platoons are at full strength and to create the spirit of rivalry among the men to put forth their best efforts in order to win "The News" Silver Cup, to be given by the general inspecting officer on or about February 20th.

Every parade night the members of the unit will be able to have hot coffee and sandwiches free at the canteen.

Immediately after the parade on Thursday, 31st February, a "smoker" will be held, and it is expected that there will be some discussion as to whether or not the unit will accept these works to be proceeded with.

Hon. Charles Stewart, minister of the interior, is expected to make an announcement toward the end of the week as to his plans for finding a seat in the House of Commons.

Considerable interest attaches to the probable date of opening the session, which the cabinet has not yet come up for decision, it is still thought that legislative plans will be sufficient to bring the session forward about the first week in March.

Department heads have been asked to rush along the work of the various departments, so that the cabinet can give them a thorough inspection before they go into the Commons, and apply the same standard to any such action is found advisable.

"D" COMPANY, 1ST BN. A. R. (31st BN. C.E.F.) CARRYING OUT INTENSIVE TRAINING AT RED DEER ARMOURIES

Red Deer can boast, as no other city in Canada, as having one of the finest, strongest and smartest units in the Canadian Non-permanent Force.

It was only this time last year that tentative plans were being launched by the authorities as to the formation of a unit at Red Deer. After a considerable amount of correspondence and forethought, the decision was made to place a command of this unit to the best of his ability, and after ten days of the most exclusive, drawing the

The man who saw the first parade of the Company, passed remarks to the effect that nothing had been made out of the fellows during peace-time, is now gasping for breath with surprise, and if one would only take a trip to Red Deer on Tuesday or Thursday evening to the Armouries, he would spend an hour in the training and admiration of the city's unit.

Every Officer, N. C. O. and man is now putting forth his utmost efforts to reach an exit. A number of others worked their way to safety through scant openings in the building.

The disaster which brought so heavy toll of human life and limb occurred in the early morning, the roof buckling in the middle and falling practically intact to the ground. WINS PRIZE FOR WINDOW DISPLAY

Mr. C. A. Malcolm, of the W. E. Lord Co., Ltd., store, of this city, has just been awarded a valuable prize for the excellence of the window display which he designed for the store during Dr. Scholl's National Demonstration Week, October 22nd to 29th.

This was a contest in which thousands of window trimmers of the leading stores in the United States and Canada participated, and it is, indeed, an achievement to have gained first prize in the display in question was notable both for artistic conception and striking arrangement.

Was indeed a credit to Mr. Malcolm.

The occasion of this window display was Dr. Scholl's National Demonstration Week, an annual event in the shoe trade. Every year thousands of Americans are introduced to the shoe trade to the education of the public along lines of foot comfort through the use of mechanical foot appliances as well as to the necessity of having proper footwear properly fitted.

The W. E. Lord Co. store makes a specialty of this kind of foot service, and has a specially trained practitioner at its disposal to fit the right type of shoe as well as explain and fit these foot comfort appliances, which have benefited so many millions of people in all parts of the world.

This expert is a graduate of the American School of Podiatry, and has a thorough knowledge of the anatomy of the foot and the causes of foot ailments. The various ailments to which the foot is subject.

WILLOWDALE

The annual meeting of the congregation of the Willowdale Presbyterian church was held on Wednesday evening, January 18. The report of the officers was read and was very interesting and encouraging.

The report of the session was read by the retiring managers. Mr. James Reay gave the report of the Sunday School, owing to the absence of the president and Secretary-Treasurer, who were unable to be present.

Mr. H. M. Hodgkinson, who was given by Mrs. R. B. Bortea, secretary-treasurer.

Mrs. W. P. Code gave the report of the Ladies Aid.

Mr. H. M. Hodgkinson gave the report of the Lord's Day Alliance, and Mr. W. P. Code for the Manne bazaar.

The Willowdale Presbyterian Society was not present owing to the officers being unable to attend.

Mr. H. M. Hodgkinson, local secretary, and Mr. D. C. Gummow, general treasurer for the whole field, gave the financial report, which was very interesting and encouraging.

The retiring managers were W. P. Reay and H. M. Hodgkinson. Mr. Reay, who was re-elected, and Mr. Hodgkinson declined the office as he believed he had reached the limit of his usefulness.

Mr. H. M. Hodgkinson was re-elected financial secretary.

A hearty vote of thanks was tendered the ladies of the community for their faithful service to the Willowdale Presbyterian Society, for the capable manner in which he handled his part of the work.

After the usual business was over, the ladies of the Willowdale Presbyterian Society were present, and the remainder of the evening was spent in social intercourse. All those who were present found it very helpful and interesting.

W.C.T.U. NOTES

The regular meeting of the W.C.T.U. was held in the Presbyterian Church, Friday, January 27th, with Mrs. J. A. McInnes in the chair and members present.

Our Evangelistic Superintendent, Mr. H. M. Hodgkinson, gave a very interesting and inspiring address, opening the meeting with hymn 238. The Bible message was read by Mrs. J. A. McInnes.

There was the keeping of the Sabbath Day, in which she set forth very sympathetically, the type of people who are in the market for our work might be proven by our hymns. Mrs. McPherson and Mrs. McInnes led in prayer, followed by the singing of hymns.

The business and study period of the evening was spent in the study of the Bible, and the secretary's report was approved as read.

The treasurer's report showed a balance of \$26.75.

This is readily realized when we see men and women on the floor enjoying themselves who have not tripped the light fantastic twice after twenty years. If this organization can act as a fountain of youth in such a short time, what will happen by spring? The Club meets every Tuesday evening at 8 o'clock. Everybody welcome.

C. M. GEORGE, Sec'y pro tem.

BOARD OF TRADE COUNCIL

Hold First Meeting for 1922—Lecture to be given by Dr. Crumphy, on "Preparations for Lieut-General Bursall's Visit—A. Speakman, M.P., Elected Honorary President.

The Council of the Board of Trade held their first meeting for 1922 on Wednesday afternoon in the City Hall, President Botterill, Secretary Stephen and Messrs. E. O. Johns, J. H. McCarty, J. A. Hule, R. B. Bayly, A. H. Moyer, R. B. Welliver, E. S. Hogg, and W. E. Lord were present.

Dr. Crumphy, in a very kind and pleasant manner, gave a lecture on the Council of Education, in response to a request from the Board. The lecture was given in the City Hall on Thursday evening, February 16, as at present arranged.

The matter of arranging a suitable reception for Lieut-General Bursall on February 22 was taken up. In view of the short time General Bursall is spending in the city it was finally decided that the President and the Board should make a committee to arrange a supper for General Bursall, where he and his staff would have an opportunity of meeting representatives from some of the city organizations.

It was decided to put on a campaign for membership in the Board. The Secretary declined to accept any salary for his services in 1922.

Mr. W. E. Lord nominated Mr. Alfred Speakman, M.P., as Honorary President of the Board for 1922. Mr. Speakman was unanimously elected.

"It Pays to Pay Cash"

The W. E. LORD CO. LTD. RED DEER, ALBERTA. AT LORDS.

FEBRUARY FOR KITCHEN RANGES

Each February we have experienced an unusual interest in Kitchen Ranges and, anticipating the usual February demand, we are offering special prices on "Fawcett High Oven," "Victoria" and "Superb," both enamel finish and plain, "McClary," "Kootenay," "Garry" and "LeRoy."

Fawcett's 'Franklin' Heaters

For living room, den or bedroom, a Franklin is just what is required—next best to the open fireplace. The "Regal Franklin" cast fireside heater burns wood or coal; has open front fireplace; swing top and five hole and lid for boiling kettle, etc. Nickel-plated side panels. Vaporizing cup urn. Nickel name plate and bright polished edges. Regular \$27.50 Special Price \$19.35

"Evening Star Franklin" is a powerful heater; open front; basket fireplace; vase urn ornament. Regular \$14.75 Special Price \$9.85

"FAWCETT'S" FAIRY OAK HEATERS

No. 11 size; regular \$11.75 Special \$7.25
No. 13 size; regular \$14.50 Special \$9.85
No. 15 size; regular \$17.75 Special \$13.25
No. 17 size; regular \$21.50 Special \$14.75

"FAWCETT'S" IDEAL HEATERS—Brick Lined

Regular \$20.85 Special \$14.75
Regular \$17.25 Special \$11.75

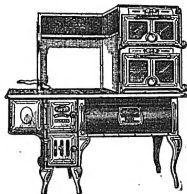

ALBERTA HOT BLAST HEATERS

Size No. 21; regular \$33.00 Special \$22.50

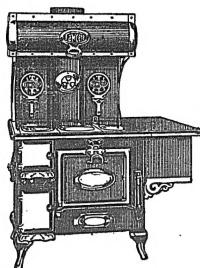

Fawcett's 'Imperial' High Oven Range

A splendid range—the result of many years of careful thought and successful experience. Ideal in conception construction and efficiency. Saves money, time, fuel, worry and annoyance. The "Imperial" is a range that every housewife should have to lessen the drudgery of the kitchen and add to the joy of life. Complete with copper reservoir.

\$115.00

Fawcett's "Superb" and "Victoria" Ranges

These two numbers are of Fawcett superior construction, based on the hot blast, smoke-consuming fire box, which is the only device of its kind applied to a steel range, and eliminates noxious gases and smoke nuisances. They burn less fuel. The "Superb" is a particularly fine range; has heavy ribbed cast fire box; duplex grate; body of heavy gauge planished steel; non-warping reinforced oven; nickel-plated oven door frame; name plate, feed and ash door, tea pot swing, etc. Complete with thermometer and reservoir \$59.95
Enamel door and back, complete with thermometer and reservoir \$64.95

The "Victoria" Range is same construction as "Superb" only smaller size.

Plain, complete with reservoir \$57.50
Enamelled back and door, complete with reservoir \$62.50

"McCLARY'S" HIGH GRADE STEEL RANGES

The "Kootenay" Range is a handsome range, constructed of the best materials and by expert workmen. The "Kootenay" will give satisfaction in cooking, baking and heating with a minimum use of fuel. Has enamelled panels and nickel-plated cast-iron trimmings.

Complete with reservoir and oven thermometer .. Special \$99.50

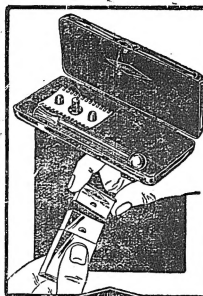

The "Garry" is of the same high grade construction as the "Kootenay." The "Garry" has a large size oven, 20x20x13 1/4, and has 6 9-inch cooking holes. Equipped with high closet, reservoir and oven thermometer Special Price, \$79.00

NICKEL-PLATED TOWEL RACKS

30 inches long; regular \$2.25 Special \$1.65

HEAVY TIN WASH BOILERS, with copper bottoms, and hook handles. This boiler weighs 10 lbs., and is good value at \$5.50 Special \$3.40

Gillette Safety Razors

A complete stock of these popular razors in handsome cases of nickel-polished gum wood, French ivory and plain pattern in triple silver-plated case, complete with 12 double-edged blades. Regular \$5.00

W. IRISH

CORRESPONDENCE

Willowdale, January 23rd, 1922.

To the Editor, Red Deer News.

Sir—

As one deeply interested in national temperance, may I, by your courtesy, reply to Mr. Brown's letter as printed in your paper dated January 11th?

I never met Mr. Brown, but am told that he is a minister of the Christian religion in Red Deer.

To be a minister of Christ and of his gospel I believe to be the highest calling men may attain to. It is one that has high honor among men only when the holder of that office upholds the authority of his Master, by and through his faithfulness to Him as the authority in all matters relating to moral and spiritual life, does he command the respect and attention of his fellow men.

Neither the great apostle Paul, nor any other, has this authority. It is Christ's alone.

Therefore I was amazed to read in his letter the following: "It seems to me it is about time that the attempt to drag our Saviour into this controversy was stopped."

Is this subject of prohibition a moral or ethical subject?

Does it have relation to spiritual life?

If so, then the highest authority on this matter is Christ, and, further, in all these matters Christ is our example.

But says Mr. Brown in effect, though not in words, "Don't drag our Saviour into this; let us appeal to a human authority, a lower authority, an authority who is not that of Christ (Cana of Galilee)."

That kind of appeal looks very much like a side-step. Now, doesn't it?

I believe Mr. Brown to be an earnest, firm, champion of prohibition, and, as such, have a respect for his earnestness, but, when he goes further and says: "But even if He did make alcoholic wine 2,000 years ago, does Mr. Wilton mean to imply that we should have a brewery or distillery?"

He would be reminding him that that is not the question, and that the implication seems to be one of his own, not Mr. Wilton's, construction.

One of the great things that bring comfort to mankind and the lifting perplexities of these days is that Christ is unchangeable. Jesus Christ is the same yesterday, today, and forever.

Mr. Brown lays some stress on the "2,000 years ago," yet "a thousand years in Thy sight is but as yesterday, when it is past, and as a watch in the night."

Christ, the unchangeable one, made wine, and, as such, has an authoritative Greek for the wine made at Cana is exactly the same word as is used elsewhere for alcoholic wine. A different word is used for fresh juice of the grape.

Perhaps it would help those who have strong, yet not bright, religious views on this subject if Mr. Brown would tell us who created alcohol.

May I venture, as courteously as possible, to remind him that his report of conversations held with unnamed and nebulous persons is not evidence, and that his assumption, that he, alone, knows facts in this matter, is not bearing out his claim to be a humble prohibitionist.

A. M. STEELE

RIDGEWOOD

The annual school meeting held on Saturday, January 21, of last week, was very well attended, and was characterized by the usual amount of interest and criticism that is generally shown in the administration of the educational affairs of this district.

Our financial condition does not seem to be improving very much, notwithstanding the extraordinary rate of taxation struck during the last year.

We have no report of conversations held with unnamed and nebulous persons is not evidence, and that his assumption, that he, alone, knows facts in this matter, is not bearing out his claim to be a humble prohibitionist.

After a severe attack of quinsy, we are pleased to see our teacher, Mrs. McKay, again able to resume her duties.

We presume those who so emphatically objected to the school being used for public purposes, will welcome with open arms the canvassers for the proposed community hall.

Mrs. C. M. Hollenbeck entertained some of her friends on Wednesday evening. Those who attended report having had a very enjoyable time.

We noticed recently an ad. in the Grain Growers' Guide for a cheap coat, and as we had one at our school meeting the other day, we believe he will fill all requirements, as he was a very fine specimen, especially his beard.

A BRILLIANT INTERPRETER

Camerlynck, the brilliant French interpreter, utterly amazes visitors to the Arms Conference at Washington, and is always the source of the greatest admiration among those who have to depend upon him to follow the proceedings when English is not spoken.

At the time the French Premier, M. Briand, made his address before the conference, he had hardly taken his seat before M. Camerlynck was on his feet interpreting his address in English. He did not falter and was never at a loss for a word in English to convey the exact meaning which M. Briand desired. But he went even further than this. He put into his voice the same tone and feeling and used virtually the same gestures as the Premier.

INDOOR SPORTS

In view of the Mittia activity at the present time, no games have been played during the past week. The standing of both the indoor baseball and basketball teams up to the present is as follows:

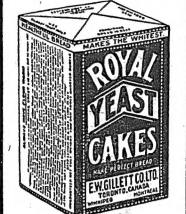

BASEBALL

Right Half Coy. Pld. Won Lost Pts.
Left Half Coy. 2 1 1 2
Cadets 2 1 1 2

NORTHCLIFFE ANALYZES THE SITUATION IN BRITISH INDIA

Condition Much More Ugly Than Home Press Appears to Know

Bombay, January 25.—Lord Northcliffe, the British newspaper publisher, yesterday gave Reuters an analysis of the situation in India after an examination lasting ten days, which he says he believes approximately represents the views of the government and the leading newspaper publicists of India.

"Returning to India after twenty-five years' absence," said Lord Northcliffe, in his analysis, "I am shocked at the change of demeanor and attitude toward the whites by both Hindus and Mohammedans, especially those of the younger generation."

For the first time in Indian history they are acting in close combination. I interrogated more than 100 Moslems of every class and sect and they are unanimous."

Lord Northcliffe enumerated the various districts he had visited, and said that in all of them, as well as in the Dutch Indies, the attitude of the Moslems was one of sullen silence or outspoken hostility.

WOMEN ARE INFECTED

He said one distinguished local Mohammedan judge told him that the most dangerous sign was that the women were becoming infected with anti-British poison, adding that all students of Islam knew what that meant.

Lord Northcliffe, noting the large number of Indians wearing white caps, denoting their adherence to the principles of Gandhi, the non-co-operation leader, said:

"The local Mohammedans demand the instant arrest of Gandhi, saying this would prevent extremist outbreaks. But peace cannot be assured until the Moslem question is adjusted. The Moslems bitterly resent our attitude, after having caused Moslem to fight Moslem in Mesopotamia. The reaction from Greece is especially resented."

EXPLAINS DEMANDS

Lord Northcliffe explained the demands of the moderate Moslems substantially as follows:

All Moslem countries intensely resent the British policy regarding Turkey. They feel most deeply the slight which they consider has been put upon the Caliphate. They revere the sultan as Roman Catholics revere the Pope and regard the integration of Turkey in Europe and Asia as much as Catholics would regard the fall of the Holy See.

Modest Moslems, whose fingers are on the pulse of Moslem feeling, told him, Lord Northcliffe said, that if the following programme were instantly carried out it would heal the wounds of these centuries and no cold tranquility in India:

1. The British should again recognize the sultan as the head of Islam and the warden of the holy palaces at Mecca, Medina and Bagdad, and grant access to them to all Moslems.

2. Adrianople should be returned to Turkey.

3. The whole of Asia Minor should be handed over to Turkey, not excepting Smyrna, for the Turks regard Asia Minor as their homeland, and while they have no legitimate grievances regarding the loss by the fortunes of war of their empire, they resent the loss of the land of their birth.

SITUATION IS UGLY

In concluding his analysis, Lord Northcliffe said:

"I express no opinions, but the Moslem situation here is much uglier than the home press appears to know. I submitted this statement to official, commercial and press authorities, who, while not necessarily approving of the details, insist upon the urgency of a complete and rapid settlement of the Moslem problem."

ARMS CONFERENCE WINDUP PREDICTED WITHIN ONE WEEK.

Washington, January 25.—Swinging into high speed, the arms conference again made quick work of the disarmament of the four-power Pacific treaty and pushed on toward a solution of the Shantung tangle and various lesser problems.

So sweeping was the day's progress that little save perfunctory details remain to bring all the diverse tasks of the conference to a simultaneous conclusion. Some of the more optimistic among the delegates were predicting that the final windup would come within a week.

HON. A. MEIGHEN WINS ELECTION

Returned in Grenville by Majority of 1,620 Over Opponent, A. K. Patterson.

Prescott, Ont., Jan. 26.—Night Hon. Arthur Meighen was returned to parliament by a majority of 1,620 votes over his opponent, A. K. Patterson, the Progressive nominee, his only contestant, in the voting in the Grenville county by-election today.

The complete returns gave Mr. Meighen 4,438 votes and Mr. Patterson 2,818. The total vote was 90 per cent of that polled in the recent federal election in the riding, when 8,733 electors went to the polls. On that occasion, A. A. Casselman, the successful Conservative candidate, obtained a majority of 2,313 over P. A. McIntosh, the Liberal candidate, and 1,838 over G. A. Payne, the Progressive standard-bearer.

The reason given for the comparatively small vote throughout the riding is that the Liberals, not having a candidate in the field, took very little interest in the election and failed to cast their votes.

Mr. Meighen secured his largest majority in urban centres, and also ran well in a number of rural districts. In Prescott, his majority was 306, the vote standing: Meighen, 619; Patterson, 313. Cardinal also gave him a big lead, the result there being Meighen, 608; Patterson, 65.

Kempville, the home of the Progressive candidate, the former premier obtained a majority of 548. Oxford, one of the rural districts, gave Mr. Meighen a gain of 348. Mr. Patterson led in only two of the rural polling divisions, namely, Edwardsburg, where his majority was 14, and in Augusta, where he secured a lead of 60.

Merivale, the only other large urban centre, gave Mr. Meighen a majority of 214, the standing there, being Meighen, 301; Patterson, 87.

FRANCE FEARS UNION OF SOVIET WITH GERMANY

Paris, January 26.—The French government, because of information received from Berlin, is much preoccupied by what it considers the possibility of an agreement between the German and Russian soviet governments with a view to forcing consideration of a revision of the peace treaties at the coming Genoa conference, it was indicated at the foreign office yesterday. That office had been advised that Earl Radek, of the soviet diplomatic force, was in Berlin, together with several other soviet representatives engaging in conference with representatives of the German government.

Premier Lloyd George's interpretation of the agenda for the Genoa conference, holding that the first subject discussed be that of general European peace, also is disturbing French official circles, while further light is desired as to just what peace questions the British premier has in mind. The French viewpoint is that peace between Greece and Turkey cannot be discussed at Genoa.

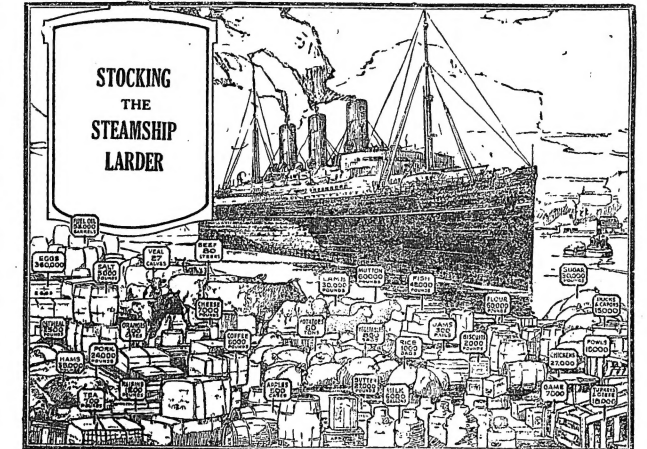

AIR LINER OF UNDREAMED-OF POSSIBILITIES MAY BE BUILT

Inventor Intends the Use of Vacuum Instead of Gas in Envelope

London, January 25.—An airship with a speed of 215 miles an hour and able to travel from London to New York in sixteen hours, using a vacuum instead of gas, is now under construction in Italy, according to advice received in London today.

The airship is the invention of Signor Vaugan. His announcement has created intense excitement in aviation circles in Europe. The inventor claims that it will not only revolutionize aerial warfare, but air transport as well.

Instead of using inflammable gas to make the airship rise, Vaugan has created a vacuum inside the envelope by means of pumps worked by engines.

Stocking the Steamship Larder	
Beef, dressed	100 lbs.
Butter	50 lbs.
Cheese	25 lbs.
Eggs	100 doz.
Flour	1000 lbs.
Fruit	500 lbs.
Ham	100 lbs.
Lard	50 lbs.
Meat	100 lbs.
Milk	1000 lbs.
Pork	100 lbs.
Produce	500 lbs.
Staples	1000 lbs.
Sugar	1000 lbs.
Tobacco	1000 lbs.
Wine	1000 lbs.
Yeast	1000 lbs.

Exhibition in Montreal of steer carcasses weighing 200,000 lbs. and game, to be used on the winter cruises to the Mediterranean and West Indies by the Canadian Steamers, "Empress of Scotland," "Empress of France" and "Empress of Britain."

Recently prize beef was placed on exhibition in Almy's window, near St. Alexander Street, Montreal, purchased at the Toronto Christmas Show for use on the forthcoming cruises of the C.P.S.L. Steamers "Empress of France," "Empress of Scotland," and "Empress of Britain."

It was arranged by the Canadian Pacific Steamships Ltd. The carcasses, all Canadian raised stock, are of exceptional quality.

For three cruises the requirements in beef are approximately 175,000 pounds, or in other terms 235 choice steer carcasses with a dressed weight of 750 lbs. each. The turkeys, chickens, capons, ducks and ducklings have been specially fattened for the particular requirements of these cruises, and no cold storage stock of any kind is to be used. The different kinds of poultry are also of uniform weight and areas.

In general the requirements for the Empress of France, Empress of Scotland, and Empress of Britain are as follows:

Beef, dressed	100 lbs.
Butter	50 lbs.
Cheese	25 lbs.
Eggs	100 doz.
Flour	1000 lbs.
Fruit	500 lbs.
Ham	100 lbs.
Lard	50 lbs.
Meat	100 lbs.
Milk	1000 lbs.
Pork	100 lbs.
Produce	500 lbs.
Staples	1000 lbs.
Sugar	1000 lbs.
Tobacco	1000 lbs.
Wine	1000 lbs.
Yeast	1000 lbs.

Potatoes 6000 lbs.
Turnips 8000 lbs.
Carrots 7000
Cauliflowers 180 dozen
Celery 240
Cucumbers 300
Egg Plant 600
Lettuce 180 dozen
Onions 7000 lbs.
Spinach 900
Tomatoes 1500
Fish, assorted 48,000
Apples 500 cases
Bananas 1,000 lbs.
Grape Fruit 100 cases
Lemons 45
Oranges 300
Pears 3,000 lbs.
Special fruit, 3,000
In addition to these quantities, grapes, fruits, and tropical delicacies will be purchased at different ports on the cruise.

The Great Novel of Last Fall and This Spring. The Best-Selling Book in America

If Winter Comes

Now in Its Two Hundred and Sixty-Fifth Thousand

"If Winter Comes" is not only a thrilling tale, it is an important work of art. I do not know where I have had more continuous enjoyment in reading a new book. "If Winter Comes" is one of the best books of our times.—William Lyon Phelps in The New York Times.

"It is penetrating, bubbling with humor, pathos and genuine excitement. . . . The home background of the war, touched only slightly, was never more skillfully done even in 'Mr. Britling'. . . . Because it is the novel of an expert craftsman it is vivid and real."—John Farrar in The Bookman.

"In its inspiration, its insight and faith in life, 'If Winter Comes' ranks as a rich and important piece of work. . . . 'If Winter Comes' should be widely read, both for its characterizations and for its story."—Emily Calvin Blake in the Chicago Daily News.

"'If Winter Comes' is more than a mere novel, it is an epic poem of very great beauty. It will last long after most other literary products of this age have gone to an obscure and unremembered grave."—Robert E. Sherwood in Life.

"The book is one of the very best that has recently appeared."—The Literary Digest.

Once Aboard The Lagger

Tenth Printing

"Anybody who likes 'If Winter Comes,' and many who don't, should read his earlier novel 'Once Aboard The Lagger'. . . . It is one of the merriest books ever written."—Howard Brown in the New York World. A delightful comedy of English life—not a sea story.

The Happy Warrior

Thirteenth Printing

"A great story this, and one which must surely win for its author a high place among the novelists whose work endures."—E. F. Edgett in the Boston Transcript.

The Clean Heart

Fourth Printing

The story of a self-centred hero and a jolly old vagabond, Mr. Puddlebox. "Power and strength and humor and human nature are here."—The New York Evening Sun.

SUPREME COURT

The first case disposed of at the Supreme Court on Monday afternoon was Rex vs. Ira Shearer on the charges of stealing the Thompson horses, near Markerville. This is the case on which the jury disagreed about a year ago at Red Deer, and which was the basis, largely, for the charges against A. H. Russell, K. C., now being tried.

Ira Shearer has been in custody ever since, most of the time serving a sentence on other convictions of horse stealing, which sentence expired recently.

The accused pleaded guilty. H. MacDonald, K. C., Edmonton, for the Attorney-General's Department, stated that the Department would consent to suspended sentence as if sentence had been passed, the time would have been served concurrently with the other sentence.

His Honor, Mr. Chief Justice Harvey, concurred in the view and released the accused on his own recognizance in the sum of \$2000 for two years' good behaviour.

OTHER CASES
Rex vs. C. Tooe, manslaughter. No charge preferred. Dismissed.

Rex vs. D. A. Adams, theft of straw, elected for non-jury trial. Set down at close of jury sittings.

Rex vs. J. Cottrell, failure to account. No charge preferred.

Rex vs. Codd, attempted murder. Accused reported to be in dying condition. Adjourned.

Rex vs. Walsh, violation of Inland Revenue Act. Will be given speedy Ottawa.

Rex vs. Slater, violation of I. R. Act. Postponed pending receipt of instructions from Ottawa.

Report of the Rex vs. Goulda Isbell case is given elsewhere.

REX VS. A. H. RUSSELL
Just before adjournment of the Supreme Court, yesterday afternoon, preliminary stages of the trial of A. H. Russell, K. C., on charges of subornation of perjury and fabrication of evidence were disposed of. The charges refer to the filing of certain papers and the presentation of certain evidence in the famous Shearer horse-stealing cases.

The accused entered a plea of not guilty, and the following jurors were empanelled:

E. Greig, L. Kenedy, A. Purdie, E. A. Kirk, L. I. Hamby and T. P. Lepard.

No evidence was taken at the request of counsel. Court adjourned till 9:30 this morning, when the case will proceed. H. MacDonald, K. C., Edmonton, is conducting the case for the Crown, and J. McKinley Cameron is chief counsel for the defence.

THE MAPLE LEAFS ARE COMING BACK

Manager Brewerton, of the Rex Theatre, completed arrangements last night with R. Lydiatt, vice-president of Trans-Canada Theatres, Ltd., for the Maple Leafs to again visit Red Deer on Friday, February 10th, with an all-new programme. The universal satisfaction with their recent performance assures them a hearty welcome on their return.

Mr. Lydiatt has practically promised to let the Dum Bells Company visit Red Deer on their return trip from the Coast at a little later date.

These are both real attractions, which reflect credit on the management and enterprise of the Rex Theatre.

FOR SCIATICA, RHEUMATISM, COLDS & PLEURISY
